

# Teaching Children Module

## DESCRIPTION

The Teaching Children Module is a one day program. It is designed for any instructor that has completed the level 1 certification and provides a more in depth understanding of how children develop both mentally and physically at different ages. The module also provides practical teaching situations for developing children of all ages as well as safety and class control. The indoor component focuses on communication with children.

There is no pass/fail evaluation for this module. All participants will earn 10 education credits for completing this module.
